SUMMARY

Adaptable Computer Science student with hands-on experience implementing AI-driven automation (automated email handling and AI call-answering/routing) alongside three years of fast-paced customer service. Comfortable working independently in remote settings, quick to learn new tools, and reliable under pressure. Looking for a remote, part-time role — ideally something IT or AI-related — where I can keep building practical technical experience alongside my studies.

WORK EXPERIENCE

AI Automation Assistant (Part-Time) 01/2024 – 07/2025

Apex27 · Real Estate Agency · Remote

- Helped implement an AI system to draft and send automatic email replies to client enquiries, reducing manual response workload.
- Set up and supported an AI-powered call-answering system that triaged incoming calls — booking meetings with management or forwarding notifications as appropriate.
- Worked with the team to adjust AI workflows to real business needs, improving response speed and accuracy.

Crew Member (Part-Time) 09/2023 – 06/2026

Five Guys

- Provided prompt and courteous customer service within a high-volume, fast-paced restaurant.
- Facilitated clear communication with customers and colleagues to ensure accurate order taking and effective issue resolution.
- Managed cash and card transactions accurately at the point of sale.
- Adapted quickly across different stations (grill, till, prep) during peak periods.

Volunteer, Medical Supply Logistics 02/2022 – 06/2022

Ukrainian Armed Forces

- Organised and dispensed essential medications to support frontline supply requirements.
- Maintained accurate inventory by monitoring and recording stock levels.

UNIVERSITY PROJECTS

Bus Timetable Integration — Group Coursework App 01/2026 – 05/2026*

University of Kent · Team project

- Worked on the backend/data side of a group-built app that integrated live bus timetable data for students on campus.
- Handled fetching, structuring and connecting timetable data so it displayed correctly within the app's front end.
- Collaborated with teammates across front-end and backend to deliver a working, demoable app within the module deadline.

EDUCATION

BSc – Computer Science and Artificial Intelligence 09/2025 – Present

University of Kent · Canterbury

- Completed Year 1 successfully; progressing to Year 2 in September 2026. Programme includes an integrated Year in Industry placement.

T Level – Digital Production, Design and Development 2022 – 2023

South Essex College

- Achieved a Merit.

General Secondary Education 09/2016 – 06/2023

Kytskiy Lyceum, Ukraine

- English, Mathematics, History, Literature, Physical Education.
- Achieved grades of 10–11 out of 12 across subjects (Mathematics: 11) — the highest ('high') performance band on Ukraine's national 12-point grading scale, broadly comparable to top-band GCSE results in the UK system.

SKILLS

Python	JavaScript	HTML	AI tools / automation
Microsoft Visual Studio	Lazarus	Microsoft Office	
Communication	Customer service	Teamwork	Remote work
Reliability	Time management	Adaptability	Problem-solving
